SECTION 7 : HANDLING AND STORAGE	
<ul> <li>7.1 PRECAUTIONS FOR SAFE HANDLING: Comply with the existing legislation on health and safety at work. General recommendations: Avoid any type of leakage or escape. Recommendations for the prevention of fire and explosion risks: Pressurised container. Protect from sunlight and do not expose to temperature exceeding 50°C. Do not pierce or burn, even after use. I naked flame or any incandescent material. Do not smoke.</li> <li>Flash point : -79. °C</li> <li>Autoignition temperature : # 402. °C</li> <li>Upper/lower flammability or explosive limits : # 1.8 - 9.2 % Volume 25°C</li> <li>Recommendations for the prevention of toxicological risks: Do not eat, drink or smoke in application and drying areas. After handling, wash hands with soap and water. Avoid applying the product animals, plants or foodstuffs. For exposure controls and personal protection measures, see section 8. Recommendations for the prevention of environmental contamination: It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6.</li> </ul>	
7.2       CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. For more information, see sector Class of storage         Maximum storage period       :       According to current legislation.         Temperature interval       :       min: 5. °C, max: 50. °C (recommended).         Incompatible materials:       Keep away from oxidixing agents, from strongly alkaline and strongly acid materials.         Type of packaging:       According to current legislation.         Limit quantity (Seveso III):       Directive 2012/18/EU:         Not applicable (product for non industrial use).       .	l sources. Do not on 10.
7.3 SPECIFIC END USES: For the use of this product do not exist particular recommendations apart from that already indicated.	

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

### **SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION**

MAD MAXXX BLACK Code: EX017M9011M

## 8.1 CONTROL PARAMETERS

mtr

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

### OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2014	Year	TLV-TWA	mg/m3	TLV-STEL	mg/m3	Remarks
Ethyl acetate	1996	400.	1440.	-	-	
n-butyl acetate	1998	150.	713.	200.	950.	
Butane	2004	1000.	-	-	-	
Xylene (mixture of isomers)	1996	100.	434.	150.	651.	A4
Propane	2004	1000.	-	-	-	
Isobutane	2004	1000.	-	-	-	

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit. A4 - Non classified as carcinogenic in humans.

### BIOLOGICAL LIMIT VALUES:

Not available

### DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

Derived no-effect level, workers: - Systemic effects, acute and chronic: Ethyl acetate n-butyl acetate Xylene (mixture of isomers)	DNEL Inhalation           mg/m3           1468. (a)         734. Protection of hands and skin: It is recommended to install water taps or sources with clean water close to the working area.									
As a general measur corresponding EC m	POSURE CONTROLS: Directive 89/686/EEC~96/58/EC: e on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the arking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the s, marking, category, CEN norm, etc), you should consult the informative brochures provided by the manufacturers of PPE.									
Mask:	Suitable combined filter mask for gases, vapours and particles (EN14387/EN143). Class 1: low capacity up to 1000 ppm, Class 2: medium capacity up to 5000 ppm, Class 3: high capacity up to 10000 ppm. In order to obtain a suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers. The respiratory equipment with filters does not work satisfactorily when the air contains high concentrations of vapour or oxygen content less than 18% in volume.									
Safety goggles:	Safety goggles with suitable lateral protection (EN166). Clean daily and disinfect at regular intervals in accordance with the instructions of the manufacturer.									
Face shield:	No.									
Gloves:	Gloves resistant against chemicals (EN374). of use of a protective gloves resistant against variety of circumstances and possibilities, the account.Use the proper technique of removir with the skin. ЕСТЮ	ON 15 : REGULATORY INFORMATI	ON	
5.1	EU SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC: The regulations applicable to this product generally are listed throughout this Safety Data Sheet.		
	Restrictions on manufacture, placing on market and use: See section 1.2		
	Tactile warning of danger: If the product is intended for the general public, is mandatory a tactile warning of danger. The tech nical specifications for tacti warning devices shall conform with EN ISO standard 11683 relating to 'Packaging - Tactile warnings of danger - Requirements.'		
	Child safety protection: Not applicable (the classification criteria are not met).		
	Specific legislation on aerosols: It is applicable the Directive 75/324/EEC~2013/10/EU, relating to aerosol dispensers and the Directive 87/404/EEC, concerning simple preasure package		
	OTHER REGULATIONS:		
	Control of the risks inherent in major accidents (Seveso III): See section 7.2		
	Other local legislations: The receiver should verify the possible existence of local regulations applicable to the chemical.		
15.2	CHEMICAL SAFETY ASSESSMENT: A chemical safety assessment has not been carried out for this mixture.		

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users' working conditions are beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product's properties.
