### SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

MTN PRO CONTACT ADHESIVE

Code: EX014PR0801

### 8.1 CONTROL PARAMETERS

mtn

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

### OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2015	<u>Year</u>	TLV-TWA		TLV-STEL		Remarks
Dimethyl ether		ppm 1000.	<mark>mg/m3</mark> 1920.	ppm -	mg/m3 -	Recommended
Hydrocarbons C6 isoalkanes (n-hexane <5%)	1982	500.	1760.	1000.	3500.	
Cyclohexane	2002	100.	344.	-	-	
Acetone	2014	250.	594.	500.	1188.	A4 , BEI

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.

A4 - Non classified as carcinogenic in humans.

BEI - Biological exposure index (biological monitoring).

### **BIOLOGICAL LIMIT VALUES:**

This preparation contains the following substances that have established a biological limit value:

- Acetone (2014): Biological determinant: acetone in urine, BEI: 25 mg/l, Sampling time: end of shift (2), Notation: (Ns).

(2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases.

(Ns) Non-specific. The determinant is non-specific, since it is also observed after exposure to other chemicals.

### DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.
