SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

Code: EX014PR1078

8.1 CONTROL PARAMETERS

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2014	<u>Year</u>	TLV-TWA	4.0	TLV-STEL		Remarks
Kerosine (petroleum), hydrodesulfurized	2003	200.	mg/m3 -	ppm -	mg/m3 -	Vapours A4 , Skin
Butane	2004	1000.	-	-	-	
Propane	2004	1000.	-	-	-	
Isobutane	2004	1000.	-	-	-	
Ethylmethylketone	1976	200.	590.	300.	885.	
Hydrocarbons C6 isoalkanes (n-hexane <5%)	1982	500.	1760.	1000.	3500.	
n-butyl acetate	1998	150.	713.	200.	950.	
Xylene (mixture of isomers)	1996	100.	434.	150.	651.	A4
Turpentine (oil)	2003	20.	111.	-	-	A4 Sc

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.

Skin - Danger of cutaneous absorption.

Sc - May cause sensitization by skin contact. A4 - Non classified as carcinogenic in humans.

Dermal (Vd): Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

BIOLOGICAL LIMIT VALUES: Not available

DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

Heat Light Air: Hum Pres Shoo	DITIONS TO AVOID: <u>·</u> Keep away from sources of heat. <u>·</u> Avoid direct contact with sunlight. The product is not affected by exposure to air, but should not be left the containers open. <u>idity</u> : Avoid extreme humidity conditions. <u>sure:</u> Not relevant. <u>k</u> : The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough hab breakage of packaging, especially when the product is handled in large quantities, and during loading and download operation	andling to avoid dents s.
10.5 <u>INCC</u> Kee	DMPATIBLE MATERIALS: Do away from oxidixing agents, from strongly alkaline and strongly acid materials.	
	ARDOUS DECOMPOSITION PRODUCTS: onsequence of thermal decomposition, hazardous products may be produced: carbon monoxide.

	 collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8. <u>Disposal of empty containers:</u> Directive 94/62/EC~2005/20/EC, Decision 2000/532/EC~2014/955/EU: Emplied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same as for the product in itself. Ensure the container is completely empty before throwing it away. <u>Procedures for neutralising or destroying the product:</u> In accordance with local regulations. Do not incinerate closed containers.
